Spectra Precision Dealer Confidential

Spectra Precision Accessories for Rotating Lasers

Spectra Precision announces the release of two laser accessories. Special optimized accessories allow lasers to be used for more applications and to accomplish those applications in a productive manner.

M401 Tilting Base Adapter

The M401 Tilting Base Adapter is a solid, reliable bracket that can be used for steep slope applications or with level-only lasers to manually accomplish grade. Formerly SECO part 4852-11.

M402 Batter Board Clamp

The M402 Batter Board Clamp is a heavy-duty, rugged bracket that can be used on batter boards or other structures and is especially useful for vertical applications. Formerly SECO part 4852-14.
